

HEAT TRANSFER SYSTEMS OF GEORGIA, LLC

We represent the following quality manufacturers:

WORLD LEADER IN EVAPORATIVE COOLING TECHNOLOGY

Open Cooling Towers
Closed Circuit Cooling Towers
Evaporative Condensers
Exact Dimensional Replacements

Highly Efficient Counterflow Design
Super Low Sound Fan Technology
Low Profile Design Options
Type 304 & 316 Stainless Steel Options

Mr. GoodTower®

PARTS AND SERVICE FOR ALL MANUFACTURERS EVAPORATIVE COOLING EQUIPMENT

EvapLiner coating to increase basin life
Fill for crossflow and counterflow towers
Gear Boxes, Drive Shafts, Motors
Hot water distribution boxes

Drift Eliminators
Online Cleaning Service
Rebuild to original performance or enhanced
EXACT Replacement Coils

SONDEX

SONDEX HEAT EXCHANGERS

Free Cooling
Pressure Interceptor
Cooling Tower Isolation
Thermal Storage
ASME and AHRI Certified

Heat Reclaim
Back-flush Valve
Removable Insulation & Drip Tray
Port Filter
Double Wall, Semi Welded & Free Flow

MEDIA FILTERS AND SEPARATORS

Side stream or full flow applications
Self contained units for basin cleaning
Dual stage high efficiency separators

Reduces solids and fouling problems
Reduces energy costs and labor costs
Improves performance

AQUANOMIX WATER MANAGEMENT SYSTEMS

Rainwater harvesting
Gray water re-use
Condensate recovery
It's GREEN & It's LEED

Reclaimed water can be used for:

- Cooling towers
- Irrigation
- Toilets

PERMA-PIPE PRE-INSULATED PIPE

Pipe-in-Pipe containment systems
Above & below ground insulated pipe
Liquid leak detection

Pre-insulated pipe for District Heating & Cooling, Oil & Gas, Environmental & Industrial Market Segments

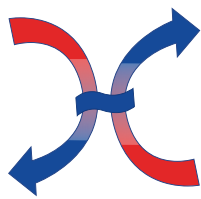

Right Fit. Right Now.

NEW & REPLACEMENT HVAC COILS

Chilled Water, Hot Water
DX Evaporator, Heat Reclaim
Condenser, Steam

Precision engineered replacement coils that always fit properly and delivered on time.
5/8", 1/2", and 3/8" OD with 6-18 fpi available

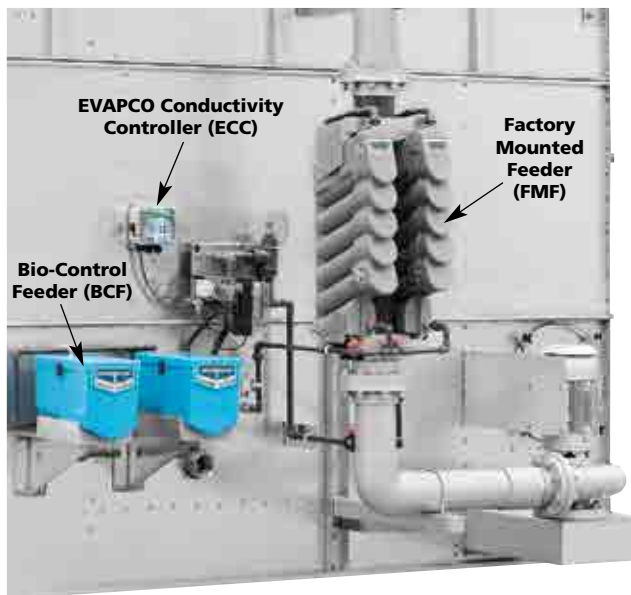

WATER TREATMENT SOLUTIONS

for evaporative cooling equipment

EVAPCO Water Systems

Smart Shield® Solid Chemical Water Treatment System

EVAPCO's **Smart Shield®** system utilizes proven solid chemistry delivered via our revolutionary feed system. Patented controlled release scale and corrosion inhibitor is fed whenever your spray water pump is energized, keeping your system protected anytime the spray water pump is operating. **Smart Shield®** is a complete water treatment package that:

- Utilizes 'Bag in Bag' no touch chemical replenishments, making reloads easier and safer.
- Creates reduced packaging, shipping and handling providing a reduced carbon footprint compared to liquid chemicals.
- Eliminates the hazards associated with liquid chemicals, potential for liquid spills and the need for expensive feed pumps making it the easiest and safest chemical water treatment system available today

Watch a short product video at:
www.smartshield.evapco.com

Pulse~Pure® Non-Chemical Water Treatment System

EVAPCO's **Pulse~Pure®** water treatment system utilizes pulsed electric field technology to provide an environmentally responsible alternative for the treatment of water in evaporative cooled equipment. The **Pulse~Pure®** system delivers short, high-frequency bursts of low energy electromagnetic fields to the recirculating water in the eco-ATWB-H.

- EVAPCO guarantees that total bacterial counts will not exceed 10,000 CFU/ml in the cooling water.
- Controls scale, corrosion, and microbiological growth with absolutely no chemicals required.
- Compact design with no moving parts and low energy consumption.
